

HOW TO USE CONNECTA FRAME

IN FOUR EASY STEPS

HOW TO BUILD A FRAME

Before assembling your structure make sure you pick the right Connecta Frame parts for your project. In our Connecta Frame range we have a variety of connection points which will allow you to build the perfect custom frame around your plants or trees.

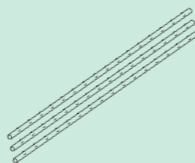

What you will also need:

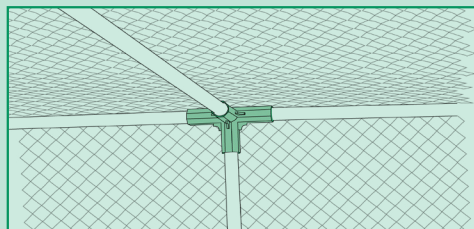

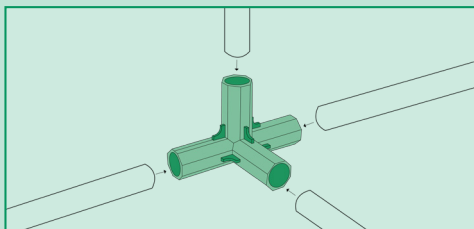

Rally Plant
Covering

Rally Galvanised
Irrigation Pegs

Rally 16mm
Plastic Coated
Steel Stakes

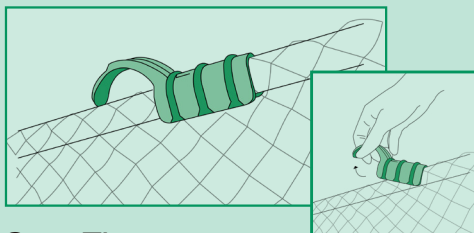

Step One

Insert Plastic Coated Steel Stakes into the your chosen Connecta Frame part.

Step Two

Once the Connecta Frame is assembled place your choice of Rally plant covering over the structure.

Step Three

Secure the covering to the structure by using the Snap Clip. Simply press the clip onto the frame. To remove the clip, lift the curved handle.

Step Four

Secure the frame to the ground with Rally Irrigation Pegs.

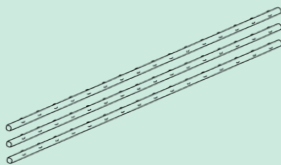

HOW TO BUILD AN 'A' FRAME

Before assembling your structure make sure you pick the right Connecta Frame parts for your project. In our Connecta Frame range we have an A-Frame Connecta and Multifunction Clip which are adjustable, allowing you to easily build the perfect A-frame around your plants or trees.

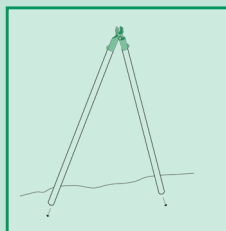

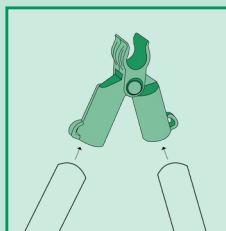

What you will also need:

Rally Plant
Covering

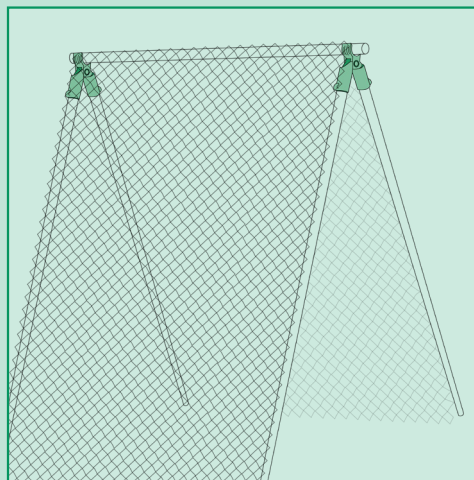

Rally 16mm
Plastic Coated
Steel Stakes

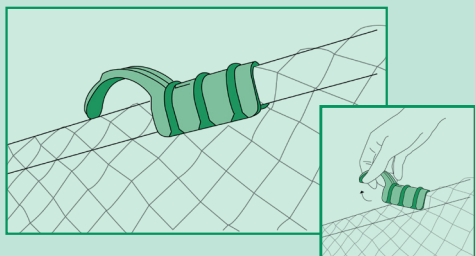

Step One and Two

Insert Plastic Coated Steel Stakes into the connecta a-frame clip then insert the Plastic Coated Steel Stakes into the ground.

Step Three

Once the Connecta Frame is assembled place your choice of Rally plant covering over the structure.

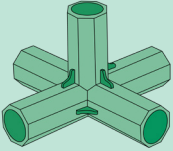

Step Four

Secure the covering to the structure by using the Snap Clip. Simply press the clip onto the frame. To remove the clip, lift the curved handle.
